

## **Ordinance #13 Off-Street Parking**

This ordinance codifies the requirement that leaseholders provide off-street parking on their leasehold for all vehicles regularly used by persons living on the leasehold. Municipalities have the right to restrict off-street parking (NCC code)

### **Issues:**

Section 4 is vague; “habitual overnight parking, such as three times a week” should be changed to a specific limit.

Section 5 gives the Safety Committee the responsibility of administering this ordinance. The ordinance specifies that the Safety Committee shall issue up to three warnings to violators prior to notice of prosecution. This policy may be too flexible. A specific number of warnings should be given in all cases of violation.

### **Recommendations**

- 1. Change Section 4 to limit overnight parking to no more than two times in one week.*
- 2. Section 5 should be revised to specify the number of warnings to be issued prior to notice of prosecution. The Safety Committee should be given authority to adopt additional policies for the administration of this ordinance.*
- 3. Fines should be reviewed.*
